MONTH 1 BUYS THE BASELINE

Broadest audience of the five, and the weakest commercial intent. He is not shopping — he is looking for an explanation.

DAYS 0–30 · LEARNING

Build this campaign’s negative list from real search terms.

Measure: ≥100 clicks and every search term reviewed; negatives added weekly.

Why: Every later target is guesswork until the wasted queries are known.

By: day 30 from launch.

DAYS 31–90 · PERFORMANCE

Establish a cost per testflight_click, then cut it.

Measure: 20% below the month-one baseline by day 90.

Why: This is the volume campaign; if its CPA does not fall, it does not scale.

By: day 90 from launch.
