SMART goals

MONTH 1 BUYS THE BASELINE

Smallest query volume of the five. Run it as a test once you know your real CPC, not before.

DAYS 0–30 • LEARNING

Find out whether the query volume exists at all.

Measure: Impression volume sufficient to judge by day 30, or pause the campaign.

Why: A campaign with no impressions is a hypothesis, not a channel.

By: day 30 from launch.

DAYS 31–90 • PERFORMANCE

Prove she stays longer than the others.

Measure: 7- and 30-day retention above the account average by day 90.

Why: She commits slowly. If it works for her it works for weeks, and that is the signal worth paying for.

By: day 90 from launch.
